1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Lasch et al 6,581,839. Lasch discloses a smart card with a chip 20 which may be connected to a phototransistor or a CCD (col 10 lines 54+), i.e. visible radiation detector. Electrically conductive connectors are inherent. The card may consist of at least regions of optically transparent, transmissive or opaque materials (col 6 lines 49+) and may also consist of polyethylene adhesives (col 8 lines 7+). There is disclosed a display device in the hologram.

3. Claims 1,10 are rejected under 35 U.S.C. 102(e) as being anticipated by Kohama et al 6,412,701. Kohama discloses a smart card with a chip, a radiation detector in form of an antenna and appropriate electrical connectors all on a substrate.
